ABOUT IIUM

The International Islamic University Malaysia (IIUM) was established in 1983 by the joint collaboration of government of Malaysia and a number of muslim countries. IIUM has ever since been distinct in its efforts to provide academic excellence nourished with moral values and virtues. Holding true to its vision statement, the university strives to serve the best to produce comprehensive graduates, imbued with high potentials and optimistic nature, yet nurtured with moderation. The Kulliyyah of Engineering was established in 1994, and it currently offers Bachelors, Masters and PhD programmes in Aerospace, Automotive. Biotechnology, Communication, Computer and Information, Mechatronics, Manufacturing, and Materials engineering.

Conference Venue:

ICBioE 2013 will be held in Kuala Lumpur, Malaysia.

INTRODUCTION

The challenges of feeding the phenomenally growing world population, finite resources, mitigating climate changes, and increasing health care issues demand concerted efforts from stake-holders such as. researchers, academics, technopreneurs, policymakers, decision makers, and captains of industry. Through collaboration and networking, there is need to find long-term solutions using development and application of innovative biotechnology principles for sustainable global peace, prosperity, and improved quality of life. To facilitate keeping pace with the rapidly growing global demand and biotechnological advancements, the Kulliyyah of Engineering at the International Islamic University Malaysia is organizing the 3rd International Conference on Biotechnology Engineering (ICBioE 2013) in Kuala Lumpur. The forum will also provide a platform for the entrepreneurs to seek partnership with scientists, engineers and technocrats etc. to commercialize their invention and products to meet the demands of the global society.

CONFERENCE TOPICS

- Agricultural and natural biotechnology products
- Biocatalysis
- Bioenvironmental engineering
- Bioinformatics and computer applications in biotechnology
- Biomass and bio-energy
- Biomaterials
- Biomedical sciences and engineering
- Biomolecular engineering
- Bio-pharmaceutical engineering
- Biosensor and biomechatronics
- Biotechnology applications in medicine and health
- Bioprocess engineering
- Ethical issues in biotechnology
- Food and process engineering
- Nano-biotechnology
- Omics technology

IMPORTANT DATES	MZ
Submission of extended abstract	15 th Mar 2013
