CONFERENCE OBJECTIVES

International Conference on Computer and Communication Engineering (ICCCE08) provides a forum for engineers, academicians, scientists and researchers to present their research activities in Computer and Communications Engineering. The focus of the conference is to establish an effective platform for institutions and industries to share ideas and to present their innovations. The Department of Electrical and Computer Engineering, International Islamic University Malaysia (IIUM) is pleased to invite authors to submit their papers to ICCCE'08, addressing issues that serve present and future development of the field.

CONFERENCE TOPICS

- Satellite, Space and Wireless Communications
- Antennas and Propagation
- 3G, 4G Mobile Communications
- Optical Communications and Photonics
- RF and Microwave Devices
- RFID, RFIS
- Signal and Image Processing
- Information Theory and Coding
- Multiple Access Techniques
- Computer Networks and Security
- High Performance Networks and Protocols
- Network Reliability and QoS
- Computer Architecture and Design
- Software Engineering and Agile Development
- Data Mining and Database Applications
- Neural Networks and Intelligent Systems
- Multimedia and Web Services
- Bioinformatics Engineering
- Agents, Knowledge-Based Technologies
- Ethics in Informatics and Engineering
- Communications IC Design
- Instrumentation and Control
- VLSI Design
- Other related topics

ABSTRACT AND CONFERENCE PAPERS

An abstract of about 300 words should be submitted to the conference secretariat. Authors of accepted abstracts will be requested to submit full papers which will be reviewed for presentation and publication in the conference proceedings. ABOUT IIUM

The International Islamic University Malaysia (IIUM) was established in 1983 by the Government of Malaysia and co-sponsored by a number of Muslim governments. Using English as a medium of instruction, the university currently serves as an institution of higher learning with international students from more than 90 countries.

The Faculty of Engineering was established in 1994, and is currently offering Bachelor, Master and PhD programmes in Communication, Computer and Information, Aerospace, Automotive, Biotechnology, Mechatronics, Manufacturing, and Materials Engineering.

ABOUT MALAYSIA AND KUALA LUMPUR

Malaysia is a land of fascinating sights and attractions. Rich in colour and contrasts, her multi-faceted charm provides intriguing images that leave visitors to the country in awe. With temperature that fluctuates little throughout the year, travel in Malaysia is a pleasure. The natural warmth of Malaysians is legendary, the friendliness and hospitality of the people would prove to be a very special experience. Its sun-drenched beaches, enchanting islands, diverse flora and fauna, forest retreats and magnificent mountains are among the best in this region.

Kuala Lumpur or "KL" as it is commonly known is the focal point of modern Malaysia. Kuala Lumpure's skyline is dominated by the Petronas Twin Towers, headquarters of Malaysia's national petroleum company. The towers were the world's tallest buildings from 1996-2003. The city's bustling streets, its shining, modern office towers, and its cosmopolitan air project an unbounded spirit of progress and symbolize Malaysia's unhesitating leap into the future. To some, this spirit seems to have been gained at the loss of some ancient culture traditions, but in many ways KL marks the continuation rather than the loss of Malaysia's rich past.
