Resilience is not easy and requires a combination of character traits, including courage, strength, will, tenacity, discipline and faith.

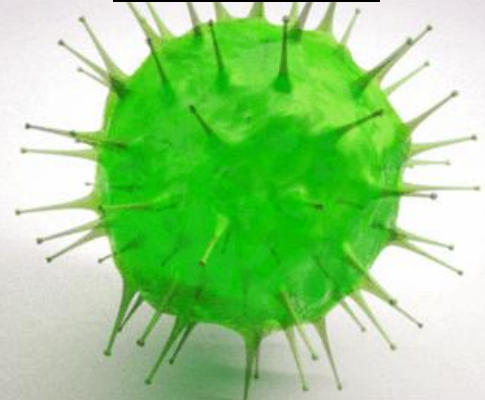

A human ability to recover quickly from disruptive change, or misfortune without being overwhelmed or acting in dysfunctional or harmful ways.

Resilience

People who soar are those who refuse to sit back and passively wish things would change. Rather, they create a powerful vision for their success and look for the opportunities in all their experiences. They will not allow circumstances to hold them back.
