International Islamic University Malaysia (IIUM)

The International Islamic University Malaysia (IIUM) was established in 1983 from co-sponsorship of Malaysia and a number of Muslim countries. IIUM has ever since been distinct in its efforts to provide academic excellence nourished with moral values and virtues. Holding true to its vision statement, the university strives to serve the best to produce comprehensive graduates, imbued with high potentials and optimistic nature, yet nurtured with moderation. The Kulliyah of Engineering was established in 1994, and is currently offering Bachelors, Masters and PhD programmes in Aerospace, Automotive, Biotechnology, Communication, Computer and Information, Mechatronics, Manufacturing, and Materials engineering.

Organized by:

Kulliyah of Engineering
International Islamic University Malaysia

Introduction

The challenges of feeding the phenomenally growing world population, finite resources, mitigating climate change, and encouraging innovation require a common effort from stakeholders such as, researchers, academics, technopreneurs, policymakers, decision makers, and captains of industry. Through collaboration and networking, they must find solutions which are sustainable in the long term through development and application of sustainable and innovative biotechnology principles for sustainable global peace, prosperity, and improved quality of life. To facilitate keeping pace with the rapid global demand and biotechnological innovation the Faculty of Engineering at the International Islamic University Malaysia is organizing the 4th International Conference on Biotechnology (ICBioE 2016) in Kuala Lumpur. The forum will also provide a platform for entrepreneurs to seek partnership with scientists, engineers and technocrats etc. to commercialize their invention and product to meet the demands of a globalized world.

Conference Topics

Agricultural and natural biotechnology products

Bioenvironmental engineering

Bioinformatics and computer applications in biotechnology

Biomass and Bio-energy

Biomaterials

Biomedical sciences and engineering

Biomolecular engineering

Bio-pharmaceutical engineering

Biosensor and Biomechatronics

Biotechnology applications in medicine and health

Bioprocess engineering

Ethical issues in biotechnology

Food and process engineering

Bio-nanotechnology

Omics technology

Metabolic engineering

Biocatalyst and enzyme technology

Abstract

An abstract should be submitted online at the conference website by **20th November 2015**. All accepted contributions will be published in the conference proceeding with ISBN. The selected high-quality papers presented at the conference will be published in indexed journal.
