

MANUSCRIPT GUIDELINES FOR ICMAE'14

GENERAL

The manuscript, including footnotes, tables, and captions for illustrations, should be typewritten double spaced on paper 210 x 297 mm in size, with margins of 40 mm on all sides. Typing should be on one side of the paper only. Each page of the manuscript be numbered, beginning with the title page.

TITLE PAGE

The title of the paper, name of author and full address of the institutions where the work was carried out should appear on this page. A short title not exceeding 60 characters should be provided for the running headline.

ABSTRACT

Abstracts in English of not more than 200 words each are required for full articles and communications. No abbreviation should appear in the abstract.

KEYWORDS

Up to a maximum of ten keywords are required and they should be placed directly below the abstract.

FOOTNOTES

Footnotes to material in the text should not be used unless they are unavoidable. Where used in the text, footnotes should be designated by superscript Arabic numerals in serial order throughout the manuscript. Each footnote should be placed at the bottom of the manuscript page where reference to it is made.

EQUATIONS

These must be clearly typed, triple-spaced and should be identified by numbers in square brackets placed flush with the right margin. In numbering, no distinction is made between mathematical and chemical equations. Routine structural formulae can be typeset and need not be submitted as figures for direct reproduction but they must be clearly depicted.

TABLES

Tables should be numbered with Arabic numerals, have a brief title, and be referred to in the text. Column headings and descriptive matter in tables should be brief. Vertical rules should not be used. Footnotes in tables should be designated by symbols or superscripts small italic letters. Descriptive materials not designated by a footnote may be placed under a table as a *note*.

ILLUSTRATIONS & PHOTOGRAPHS

Illustration including diagrams and graphs are to be referred to in the text as 'figures' and photographs as 'plates' and numbered consecutively in Arabic numerals. All photographs (glossy black and white prints) should be supplied with appropriate scales.

Illustrations should be of print quality; outputs from dot matrix printers are not acceptable. Illustrations should be on separate sheets, about twice the size of the finished size in print. All letters, numbers and legends must be included on the illustration with the author's name, short title of the paper, and figure number written on the verso. A list of captions should be provided on a separate sheet.

UNIT OF MEASURE

Metric units must be used for all measurements.

CITATIONS AND REFERENCES

Items in the reference list should be referred to in the text by inserting, within parentheses, the year of publication after the author's name. If there are more than two authors, the first author should be cited followed by 'et al'. The names of all authors, however, will appear in the reference list.

In the case of citing an author who has published more than one paper in the same year, the papers should be distinguished by addition of a small letter, e.g. Choa (1979a); Choa (1979c).

In the reference list, the names should be arranged alphabetically according to the name of the first author.

The abbreviation for Malaysian Journal of Mathematical Sciences is *Malaysian J. Math. Sci.*

The following reference style is to be observed:

Monograph

Confrey, J. 1990. What constructivism implies for teaching. In Davis, R., Maher, C. & Nodings, N (Eds.) *Constructivist Views on the Teaching and Learning of Mathematics*, JRME Monograf, No. 4. NCTM, Reston, VA
