

MORTH - Master of Orthopaedics (Orthopaedic Surgery)

Taking into account Malaysia's pressing need to produce specialists in various medical disciplines in order to promote advancements in medicine, the Kulliyyah of Medicine offers Master in Orthopaedic Surgery. The programme is a clinical coursework programme in which research is a component.

Programme Description

1. Full time 4 years programme
2. The maximum duration of study shall be seven years

The programme is divided into 4 years aimed at allowing progressive mastery of knowledge, skills and attitude, increasing responsibilities and independence.

Year 1

The general objective is to enable students to acquire knowledge of the basic medical sciences and principles of orthopaedic surgery. To apply the knowledge in the clinical problem-solving and decision-making process in the management of patients including performance of operative procedures under supervision.

Trainees will be rotated in General Surgery, Orthopaedics and Traumatology and Intensive Care posting.

Year 2

The general objective is to enable students to acquire knowledge, skills and develop good attitude appropriate for the management of patients in the various surgical Orthopaedics subspecialties which will be useful in their general Orthopaedics practice.

Year 3

The general objective is to enable the trainee to acquire knowledge, skills and develop attitude in the management of patients and the orthopaedics team in General Orthopaedic Surgery at the level of the registrar.

Year 4

The general objective is to enable the trainee to function as the senior registrar in the orthopaedic team and to manage critically ill patients. The trainee will be able to perform the right hand person to the consultant.
