Profile

Having initial interests and capacity in areas of transportation and traffic planning and engineering, Syahriah Bachok currently expands her research capability in the fields of tourism planning and infrastructure assessment.

She has been involved with a number of transportation studies and transportation sectoral studies in various Local/Structure and Master Planning exercises at both the university, local, state and national levels. Currently holding the post of Head of Research, her responsibility and passion now centre around working with young researchers in developing intrinsic research and consultancy skills in hoping to secure as many research grants and fundings possible.

Her short stints with Jabatan Perancangan Bandar dan Desa Semenanjung Malaysia and Rekarancang (Urban Planning Consultant) Sdn Bhd. have enriched her teaching skills, ranging from Research Methodology, Transportation Planning, Traffic Engineering, Transportation Economics, Tourism Planning and other urban planning related courses.
